

Set up new Mozilla/Thunderbird to work with HTC Email powered by Google™

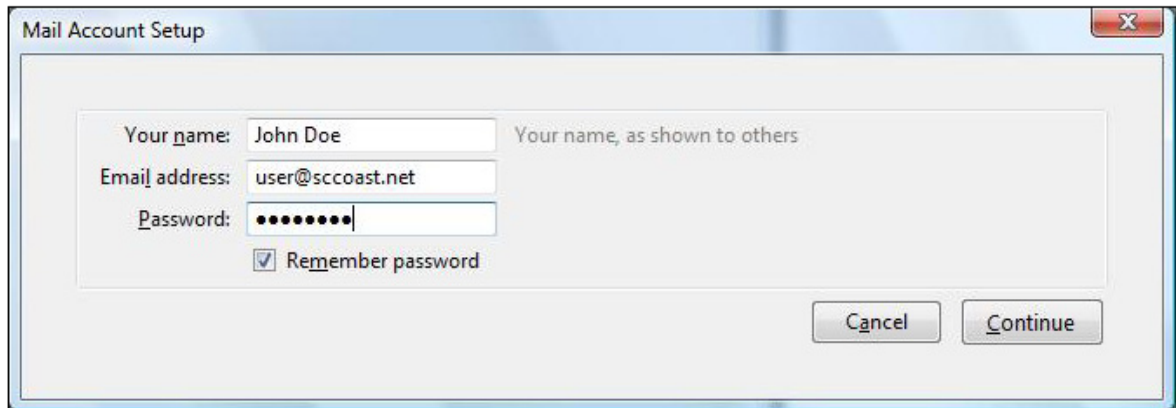

1. Open your Mozilla/Thunderbird mail “client”
2. Click on the **Tools** menu
3. Select **E-mail Accounts**

4. Select **Add Mail Account**

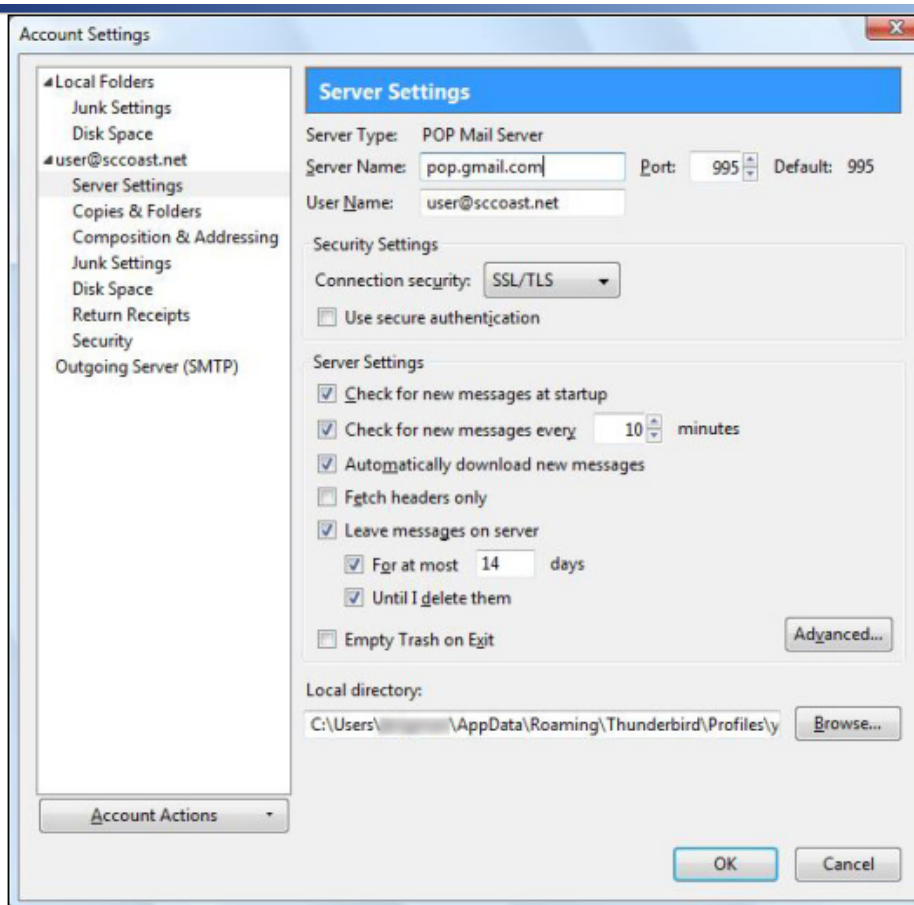

5. Enter the information as in the example below:

The 'Mail Account Setup' dialog box contains the following fields and options:

- Your name: John Doe (with a tooltip: Your name, as shown to others)
- Email address: user@sccoast.net
- Password: [masked with dots]
- Remember password
- Buttons: Cancel, Continue

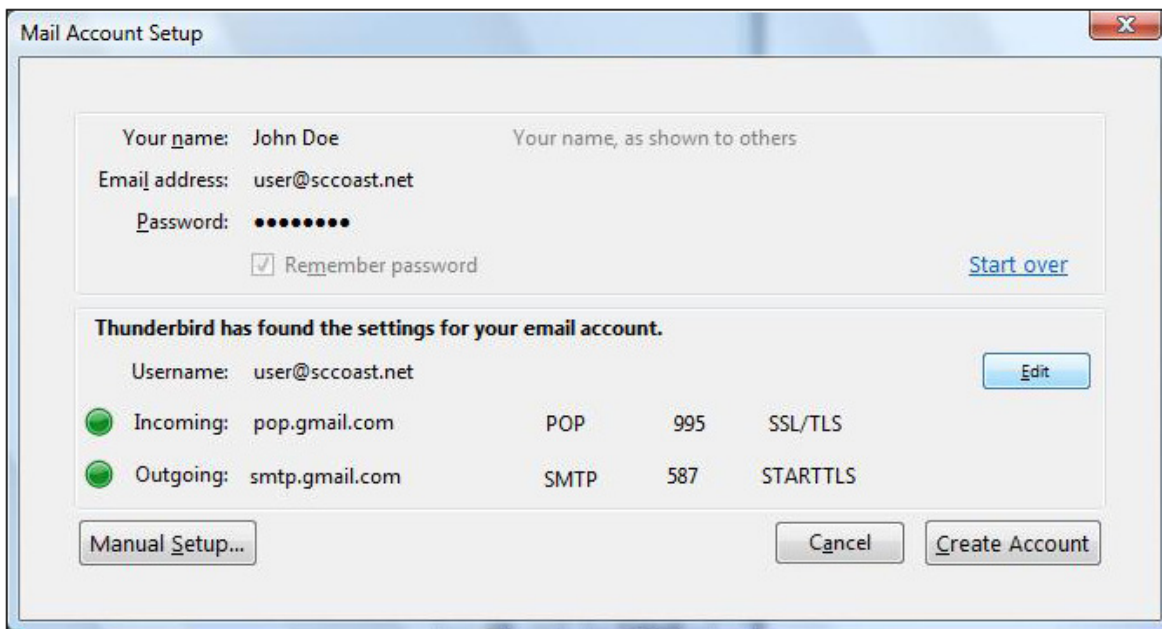

6. Click **OK**

The 'Account Settings' dialog box shows the following configuration for the 'user@sccoast.net' account:

- Server Settings**
 - Server Type: POP Mail Server
 - Server Name: pop.gmail.com | Port: 995 | Default: 995
 - User Name: user@sccoast.net
 - Security Settings: Connection security: SSL/TLS | Use secure authentication
 - Server Settings:
 - Check for new messages at startup
 - Check for new messages every 10 minutes
 - Automatically download new messages
 - Fetch headers only
 - Leave messages on server
 - For at most 14 days
 - Until I delete them
 - Empty Trash on Exit
- Local directory: C:\Users\...\AppData\Roaming\Thunderbird\Profiles\y | Browse...
- Buttons: Account Actions, OK, Cancel

7. Ensure that your information matches the example below:

8. Click **Create Account**

9. You are finished!
